

Sprint reviews group 10

Sprint 1

Sprint master: Eemeli Ponkilainen

Sprint included creating documents and designing the UI and database for the application. The creations of the UI and database ended up getting postponed to the next sprint.

Sprint 2

Sprint master: Joonas Ronimus

Sprint included implementing MVC for all pages and database creation. Testing also began. Adding CSS and some parts of testing ended up being postponed due to changes to the structure of code.

Sprint 3

Sprint master: Jesse Nieminen

Sprint included implementing more functionalities and connections to the database. Problems happened during Junit testing and using Jenkins and docker, which led to more postponement.

Sprint 4

Sprint master: Juho Simpanen

Sprint included a complete refactoring of the database operations.
